Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

See the formality issues addressed below regarding the Specification and the Drawings.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Specification

2. The disclosure is objected to because of the following informalities: At page 4, line 14, "DTCH" should be changed to ----DCCH---- to properly describe the operation. At page 22, line 12, the word "from" should be deleted.

Appropriate correction is required.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the 'apparatus in a base station' comprising 'a MAC controller', 'a resource controller', and 'a SIG controller', and the 'apparatus in a mobile station' comprising 'a SIG controller', 'an RC',

and 'a MAC controller' must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 1-58 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: Prior art fail to teach a method and apparatus for releasing a Supplemental Channel comprising the functions of determining whether to transition from the current

state to another state upon request of releasing the Supplemental channel; generating a message indicating release of the Supplemental channel and a next state to transition to and transmitting the message to a mobile station; and mobile station being responsive to the message and releasing the Supplemental channel and transitioning to the next state.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Razaiifar et al. patent, the Kim et al. patent, the Gray et al. patent, the Lee et al. patent, and the Li et al. patent are cited for further teachings relating to channel release and state change. These references, while teaching the state change in relation to the release of fundamental channels and dedicated control channels, do not teach the determination of state transition upon request of releasing the Supplemental channel.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Min Jung whose telephone number is 703-305-4363. The examiner can normally be reached on Monday-Friday, 7AM-3PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on 703-308-5340. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
